

PASSION FOR CREATION

About Us

Kuber, an ISO 9001:2015 certified company, has developed a sound production and quality control infrastructure to match the stringent quality expectations of clients. In-house laboratory and trained Chemists monitor quality both at the raw material as well as finishing stages, there by ensuring batch to batch consistency in quality.

Our quality tested products are used in different processes such as film extrusion, sheet extrusion, injection molding, roto molding, blow molding etc. Our wide range of products like white masterbatch, black masterbatch, color masterbach, additive masterbatch and engineering plastics compounds make us a quality manufacturer.

Kuber Polyplast feels proud to introduce itself as a team of young, qualified and experienced engineers, who work with passion and dedication to exceed customer expectations. Ever since inception, we have achieved an invaluable loyalty and respect from our clients along with excellent growth rate.

Exports to 30+ Countries

World Class Facilities

High Production Capacity

Growth: India And Beyond

With Manufacturing Facilities in New Delhi, Kuber polyplast has an extensive footprint in the market. This foot print gives kuber polyplast reach and speed-to-market and ensure timely delivery of solutions to customers and partners. With a production capacity of 12 thousand tons per annum and a strong network of distribution, Kuber polyplast caters to the burgeoning domestic market and export more than 30 countries.

RESEARCH AND DEVELOPMENT

Research & Development is an essential investment in a company's future and is essential to our growth and strategy. An expert team of highly specialized engineers and technicians work with dedication to ensure the timely and successful development of new products.

We are having a specialised and talented team of experienced professionals for quality testing of the products manufactured by us.

Kuber feels proud to introduce itself as a team of qualified and experienced engineers. Quality always speaks. With Services of Kuber Polyplast since the date of inception we have achieved an invaluable loyalty and respect from our clients. We bank upon our experienced engineers and technicians who not only manufacture products after studying customers need but also give them guidance to enable them to bring out their best. In order to provide personalized service to our customers we have wide spread network of marketing managers covering all parts of India, they work round the clock and give heed to the customer needs. The key factor of our success is the consistency of the materials and the service which we render to our customers. Through our R & D, we are looking forward to introduce new innovative products, in order to give our customers the benefits, which they would not have even imagined off.

Quality

- Quality for us is above all, the Management of our human capital is based on the development of Skills and know-how.quality testing of the products manufactured by us.
- The company motivates and encourages its people to work together on frames of reference and standards to achieve results that meet our customer's expectations.

Commitments

- Ensure personal safety by anticipating risks in product and processes.
- Comply with regulatory and legal requirements, non-use of child labour and forced labour.
- Develop innovative products and processes.
- Satisfy our customers
- Eliminate wastage and losses.

Our Product Range

Kuber polyplast is renowned both nationally and internationally as a leader in Various types of products such as :

Kuber polyplast has an active color library of over 10000 shades. An accurate color matching protocol involving a comprehensive pigment library and state of the art spectrophotometer and other R&D equipments ensures quick and precise colour matching.

- Pearl Colour Masterbatch
- Marble Effect Masterbatch
- Florescent Colour Masterbatch
- Special Effect Masterbatch
- Outdoor Colours Light Fastness 7- 8
- Lead And Heavy Metal Free Colors

(ROHS Compliant)
Database of Pantone and RAL shades
for extrusion and molding

Benefits:

- ★ Offer very High colour strength compared to competitive concentrates.
- ★ Good heat stability, light fastness & no migration properties in the final Products.
- ★ Improve the appearance and performance of resins to meet the exact specification.
- rovide excellent processibility, outstanding colour stability and strength.
- ★ Extremely low filter pressure value, therefore can be used for critical applications.

White Masterbatch

From simple injection molding application to multi-layer films, Kuber polyplast has a very extensive range of White masterbatches based on Rutile TiO2, anatase TiO2, extenders etc. Thanks to our state of the art R&D facility and extensive experience we offer White masterbatches for almost all applications and polymers.

Benefits:

- Loading upto 80% Titanium Dioxide.
- Best Balance of whiteness and opacity.
- Excellent UV protection and dispersion.
- ★ Wide Range based on rutile TiO2, anatase TiO2, extenders etc.
- Specially designed and optimised various grades, understanding the critical parameters of the final usage.

Some our White Masterbatch Grade

NAME	GRADE NO.	CB%	CAREER RESIN	APPLICATIONS	
SPL WHITE	KWT1390	70%	PE	Compounding, Pipes & Film extrusion Rotomolded tanks, HDPE Pipes, Molding & Film extrusion	
SPL WHITE	KWT1471	70%	PE	Injection molding ,film	
SPL WHITE	KWT60600	500 PE Suitable for films, Injection molding, Blow Molding & high end Rotational Molding.		Suitable for films, Injection molding, Blow Molding & high end Rotational Molding.	
SPL WHITE	KWT50500	<mark>50</mark> %	PE	Injection molding, Blow molding & thick film.	
SPL WHITE	KWT404 <mark>00</mark>	40%	PE	Thick film extrusion & Injection molding.	
SPL WHITE	KWT1301	35%	PE	Suitable for films,multilayer	
SPL WHITE	KWT1297	35%	PE	Suitable for injection molding.	
SPL WHITE	KWT1273	15%	PE	Suitable for films,multilayer.	
SPL WHITE	KWT1013	10%	PE	Economy grade for injection molding and film	

Black Masterbatch

Kuber polyplast has developed an extensive range of black masterbatches based on PE and universal polymers. This product range comprises specially selected carbon blacks (18nm to 65nm) to give a spread of properties from high jetness, UV protection and food contact approval to more economical blacks for imparting only coloration. Besides a standard range we also customize our black masterbatches as per customer needs.

Benefits:

- Optimised critical parameters like structure, particle size, colour strength, UV stability, ability to impart gloss, etc
- **Excellent performance alone OR combination with other stabilizers**
- Based on ultra fine carbon black that gives the best black colour
- ☆ Gives excellent carbon black dispersion & high jet ness value
- ★ Black masterbatches upto 60% Carbon black loading
- ★ Low grit content & impurities

Some our Black Masterbatch Grade

PRODUCT NAME	GRADE NO	CB%	CAREER RESIN	FILLER	APPLICATIONS
SPL BLACK	KBLK51500	50%	PE	NO	Premium black based on P-Type Carbon, suitable for Irrigation Pipes, etc (meets IS 4984 Specs).
SPL BLACK	KBLK51500S	50%	PE	NO	Pipes & Film extrusion
SPL BLACK	KBLKTR501	50%	PE	NO	Compounding, Injection molding
SPL BLACK	KBLK40400	40%	PE	NO	Geo textiles, Thin films (for high gloss and jetness) & UV Sensitive applications. Roto
SPL BLACK	KBLK66040	40%	PE	NO	Pipe & film extrusion
SPL BLACK	KBLK1201	40%	PE	NO	Compounding, Injection molding (for high gloss and jetness).
SPL BLACK	KBLKTR402	40%	PE	NO	Film Tarpaulins, Lamination and Precision moldings.
SPL BLACK	KBLK087	35%	PE	NO	General Purpose molding and Extrusion grade,Tarpaulin.
SPL BLACK	KBLK252550	25%	PE	YES	Economical grade for all type Molding & Garbage bags.
SPL BLACK	KBLKAS	12%	PE	YES	Economical grade for all type Molding & Garbage bags.

Applications of

Additive Masterbatch

- Anti Microbial Masterbatch
- Antistatic Masterbatch
- PIB Masterbatch
- Glow in dark Masterbatch
- Clarifier Masterbatch
- Antitermite Masterbatch
- Purging compound
- Impact modifier
- Nucleating & clarifying Agent
- Heat stabilizer Masterbatch
- Foaming Agent
- Odor absorber Masterbatch
- Light diffuser Masterbatch
 - VCI Masterbatch

- OB Masterbatch
- Anti fog Masterbatch
- Anti rodent Masterbatch
- UV Masterbatch
- Slip masterbatch
- Anti blocking Masterbatch
- Silicon Masterbatch for HDPE pipes/Ducts
- PPA Masterbatch
- Fragrance Masterbatch
- Anti Oxidant Masterbatch
- Flame Retardant Masterbatch
- OXO-Biodegredable Masterbatch
- Dessicant Masterbatch

Some of the Industries we serve :-

Automotive

Blow Moulding

Cable Coating Extrusion

FIBC bags

Films and Packaging

Injection Moulding

Multifilament yarn

Non Woven Fabric

Pipe Extrusion

Raffia

Roto Moulding

Sheet Extrusion

WE EXPORT ALL OVER THE GLOBE
